EXPERIENCE

- **Software Engineer II — Frontend Lead**

Apr 2023 – Apr 2025

Ironalytics · ironalytics.com · Remote

 - Engineered large-scale Angular 16+ enterprise dashboard with dynamic tables, filters, inline editing, and multi-step approval workflows for pipeline management platform.
 - Built reusable component library (modals, alerts, dropdowns, loaders) across 8+ modules — reducing code duplication by ~40% and enforcing UI consistency.
 - Boosted performance via OnPush change detection, lazy loading, preloading strategies, and trackBy — measurably cutting load times on data-heavy views.
 - Implemented RBAC with JWT-secured login flows and threshold-based alert systems across all user roles.
 - Served as primary client point of contact — led weekly calls, sprint demos, and stakeholder communications.
 - Managed and mentored 2 junior developers; conducted code reviews and elevated Angular/TypeScript proficiency.
 - Facilitated all Scrum ceremonies as Scrum Master — sprint planning, stand-ups, retrospectives, and Jira management.
 - Built Node.js automation scripts for bulk data processing, significantly reducing manual effort.
- **Software Developer → Informal Tech Lead**

Feb 2019 – Jun 2022

Broadstairs IT Solutions · broadstairs.in · Pune

 - Progressed from PHP intern to Angular/React specialist to informal tech lead managing 2–3 developers on international client engagements within 3 years.
 - Independently delivered end-to-end client projects: requirements gathering, frontend architecture, API integration, deployment, and client sign-off.
 - Built cross-browser, pixel-perfect responsive UIs using Angular and React across desktop, tablet, and mobile devices.
 - Integrated frontend applications with REST APIs using JWT-based authentication and secure coding practices.
 - Acted as Scrum Master — ran daily stand-ups, sprint planning, Jira boards, and presented demos to international clients.
 - Conducted regular code reviews and fostered a culture of quality and continuous improvement across the team.

KEY PROJECTS

PIL — Pipeline Management System

Angular 16+ · NgRx · RxJS · REST APIs · Angular Material

- Designed enterprise-grade dashboard for managing operational pipelines with real-time data.
- Built dynamic tables with custom filters, sorting, and inline editing for data-heavy modules.
- Developed reusable Angular components (modals, alerts, dropdowns, loaders) for UI consistency.
- Integrated REST APIs for complex workflows: escalation triggers, approvals, and assignments.
- Enhanced performance using lazy loading, preloading strategies, and optimised change detection.

Bridge Monitoring & Maintenance System

Angular · IoT Sensors · WebSockets · RBAC · Feature Modules

- Created intuitive dashboard to track health and usage metrics of multiple bridges using IoT sensors.
- Developed dynamic chart visualisations showing vibration, temperature, and structural stress data.
- Implemented secure login, role-based access, and condition-based rendering for sensitive data.
- Built early-warning alert systems based on sensor thresholds with high-maintainability architecture.

Sortted — Time Management & Productivity Tool

sortted.com

React · Python (Flask) · Custom Calendar · Chart.js

- Developed UI for daily planners, task lists, and priority-based time blocks.
- Integrated custom calendar with drag-and-drop task rescheduling.
- Built progress tracking with productivity charts, milestone analysis, and CSV/print export.

Pantomah — School Management Software

pantomath.com

React · Python (Flask) · Firebase · Real-time Push Notifications

- Built dashboards for admins, students, and teachers with personalised content and role access.
- Developed attendance tracking, timetables, exam results, and notification systems.
- Integrated Firebase for real-time updates and push alerts across all user roles.

iCONNECTIONS — Connection Platform

iconnections.io

Angular · Node.js · TypeScript · Express.js

- Analysed client requirements and developed functional requirement flows and optimised APIs.
- Collaborated with stakeholders to align API architecture with client needs and business goals.
- Optimised API performance and security for reliable, scalable operations.

MEMONID — Full Stack Application

Play Store

Angular · Node.js · MongoDB · AWS EC2 · Nginx · Serverless

- Built reusable components and designed APIs for efficient frontend-backend interaction.
- Configured EC2 with Nginx and SSL; later transitioned to serverless for scalability and cost efficiency.
- Managed deployments and optimised release processes for minimal downtime.

Ryzali — E-commerce Platform

PHP · CodeIgniter · AJAX · Responsive Design

- Built frontend features: product listings, category filters, and full checkout flow.
- Implemented AJAX-based search and dynamic product sorting for improved UX.
- Worked with designers to ensure responsive, mobile-friendly interface across all devices.
